

MS-RT™

FORD RANGER MS-RT

Model Year 21.50

MS-RT AWARDED QVM BY FORD MOTOR COMPANY

MS-RT have been awarded Qualified Vehicle Modifier (QVM) status by Ford Motor Company.

What is QVM?

QVM converters must meet set standards in manufacturing and quality control, which are assessed regularly. These converters must also prove that their vehicles follow Ford's Body and Equipment Mounting Manual (BEMM), follow quality control processes and offer a warranty for the conversion that matches.

What does this mean for you?

- We meet Ford's standards in manufacturing, engineering and quality control.
- We are regularly assessed by Ford.
- We offer comprehensive customer support.
- All conversion work is guaranteed by us and it doesn't affect your Ford warranty.
- The product is approved by Ford to sell in their dealerships.

Ensuring your investment is protected so you can enjoy peace of mind.

FORD RANGER **MS-RT**

Developed in partnership with Ford, the Ford Ranger MS-RT combines a stunning motorsport-inspired appearance with a premium specification and unique, hand-finished detailing.

IMPOSING APPEARANCE

Ranger MS-RT's unique exterior includes a hand-built front fascia featuring a honeycomb carbon fibre-effect grille and integrated fog lights. The striking side profile adds to the sporty character while the extended wheel arches and sculpted side skirts create a purposeful stance. Frozen White, Sea Grey or Agate Black paints emphasise the imposing styling, embellished by carbon fibre-effect mirror caps, an aerodynamic load bar and MS-RT badges.

BRAWN TO BE WILD

The vehicle comes with bespoke 20" OZ Racing Alloy wheels fitted on premium tyres, improving handling and responsiveness, whilst maintaining payload capacity.

ECONOMY WITH REAL POWER

The Ranger MS-RT comes with Ford's Bi-turbo 213 PS 2.0-litre EcoBlue engine, and is fitted with the advanced 10-speed automatic transmission shared with the Ford Mustang sports car. The powertrain delivers 213 PS and 500 Nm of torque to move payloads of up to 1,098 kg and a towing weight of up to 3,500 kg.

Ranger's selectable four-wheel drive system is retained for optimum traction off-road, while a Maxhaust app-controlled soundbar is available as a dealer-fit option for customers desiring a sporty soundtrack.

MS-RT™

MAKE IT WORK FOR YOU

Select the variant that suits you:

The Ford Ranger MS-RT comes on two configurations, the Double-Cab and Super-Cab. Ford's Brink fixed tow bar can be fitted from factory for extra transport capability, allowing a towing capacity of up to 3,500kg.

- 4 seat Super-Cab
- 5 seat Double-Cab

KEEP YOU CONNECTED IN COMFORT

The Ranger MS-RT cabin features premium leather trim with contrast orange stitching. Ambient lighting and heated front seats create a comfortable environment, while MS-RT branded floor mats and scuff plates adds a bespoke feel. Ford's SYNC 3 connectivity and navigation system 1 with 8-inch touchscreen simplifies access to communication, entertainment features and the rear-view camera 2 aids you when parking or hitching to a trailer.
